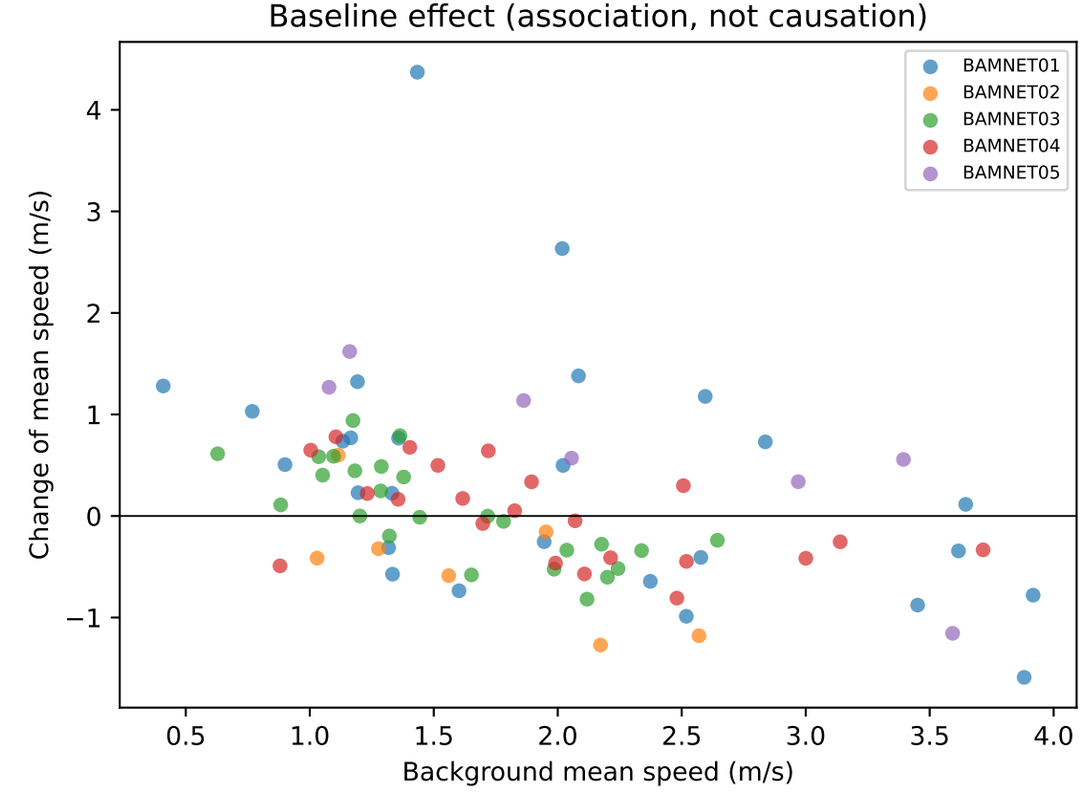
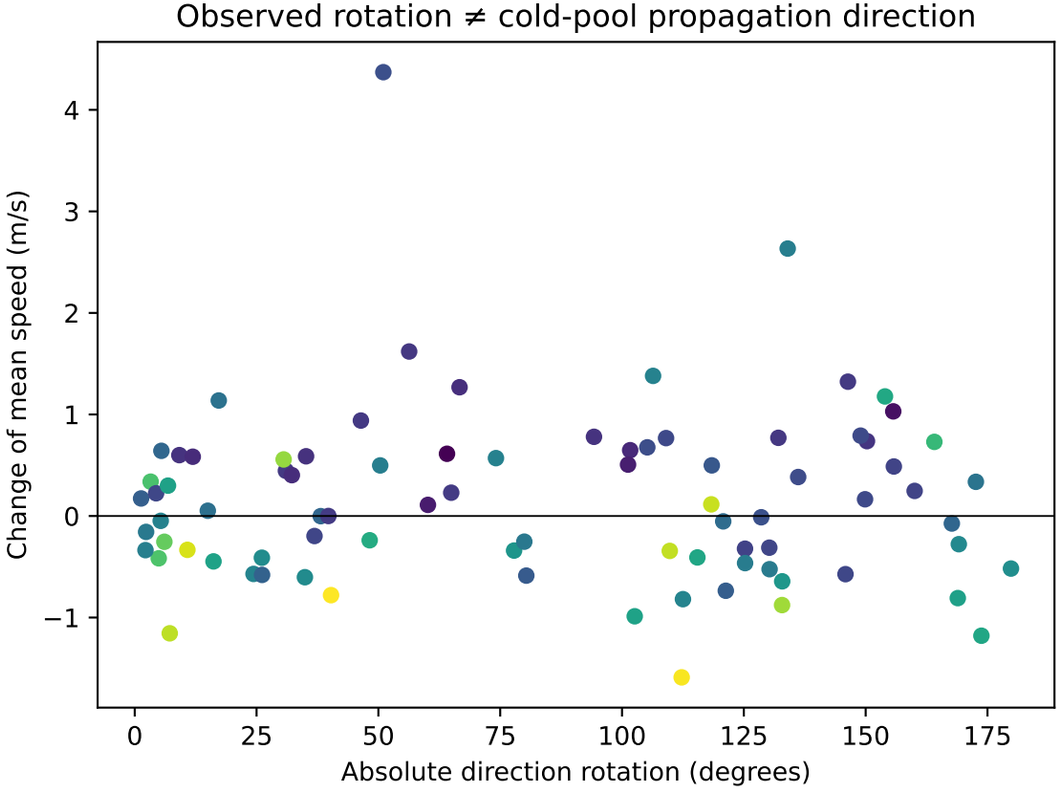
91 real thermal-only episodes; available windows only
Valid thermal-only events
Post-event mean − background mean speed (m/s)

Vector mean directions; pre/post resultant ≥0.5 m/s
Events
Signed wind-direction rotation (degrees)



Baseline effect (association, not causation)
BAMNET01
BAMNET02
BAMNET03
BAMNET04
BAMNET05
Change of mean speed (m/s)
Background mean speed (m/s)



Observed rotation ≠ cold-pool propagation direction
Change of mean speed (m/s)
Absolute direction rotation (degrees)
